PROFESSIONAL SUMMARY

I help organisations implement structured processes, coordinate complex projects, and deliver results without delays or confusion. As an Operations & Implementation Project Manager (PMP), I step into fast-moving environments and create order — building robust schedules, aligning teams, controlling costs, and keeping stakeholders informed at every stage.

Whether a company is scaling quickly, launching a new system, or struggling to keep delivery on track, I bring the structure and execution discipline needed to get things done. Reliable, organised, and easy to work with. Available for remote and international engagements. Experienced with Primavera P6, MS Project, and ClickUp across Waterfall and structured delivery environments.

CORE COMPETENCIES

- Project Scheduling & Delivery (Primavera P6 · MS Project · ClickUp)
- Operations Organisation & Implementation Management
- Cost Tracking, Budget Control & Performance Reporting
- Remote Team Coordination & Stakeholder Communication
- Risk Identification, Recovery Planning & Issue Resolution
- PMO Setup, Governance & Executive Dashboarding

TOOLS & TECHNOLOGIES

Scheduling: Primavera P6, Microsoft Project, ClickUp **Collaboration:** MS Teams, Zoom, Google Workspace
Documentation: SharePoint, Confluence, Microsoft Office Suite **Frameworks:** Waterfall, Kanban

PROFESSIONAL EXPERIENCE

Project Scheduler – BS 2026 Construction & TELCO 2026 Telecom Projects

Quicksilver Project | February 2026 – Present

- **Challenge:** Two major concurrent projects — a large-scale construction programme (NGN 8B+) and a telecom deployment — required unified scheduling, cost visibility, and executive reporting across a single portfolio.
- Led implementation of a full Enterprise Project Structure (EPS) in Primavera P6, building complete WBS, Gantt charts with critical path visibility, and a comprehensive Resource Register covering labour, equipment, and materials.
- Assigned budgeted costs at activity level across both projects, enabling precise cost tracking, procurement planning, and cash-flow management.
- Delivered executive-ready dashboards and project documentation, improving stakeholder decision-making speed and visibility across the entire portfolio.

Project Manager / Scheduler – AKK Gas Pipeline Fibre Optic Backbone Project

Kennyworks Limited (Sicilsado Group) | February 2025 – January 2026

- **Challenge:** Multi-site fibre optic rollout with complex interfaces between civil works, installation, splicing, testing, and network integration — all running concurrently with tight milestone deadlines.
- Implemented an integrated Primavera P6 schedule across all workstreams, with proactive risk analysis and recovery planning — improving on-time milestone delivery by 20%.
- Reduced crew idle time by 15% through resource forecasting and productivity monitoring, accelerating overall deployment timelines.
- Coordinated commissioning, acceptance testing, and handover documentation in full compliance with regulatory, quality, and HSE standards.

Technical Project Manager – Electrical & Instrumentation (E&I) Works

A.A. Rano Nigeria Limited | Lubricant Oil Blending Plant, Kano | September 2024 – January 2025

- **Challenge:** E&I installation and commissioning inside an active industrial facility with zero tolerance for delays — any slip risked pushing back the entire plant start-up.
- Built and maintained a detailed project schedule with daily variance tracking; conducted RCA and FMEA to resolve issues before they escalated — achieving 95% schedule adherence throughout.

- Managed cost tracking and material control for electrical panels, instruments, cabling, and bulk materials, keeping procurement aligned with approved budgets.
- Ensured all pre-commissioning and commissioning milestones were met ahead of plant start-up, with full HSE, quality, and scope compliance.

Project Manager / Scheduler – Quicksilver Website Project

KSD Multicorp | July 2023 – August 2024

- **Challenge:** A multi-workstream digital project — web design, hardware setup, software development, and network infrastructure — with no existing delivery framework or coordination structure.
- Implemented end-to-end project planning using MS Project and Primavera P6: WBS, task sequencing, dependencies, milestones, and baseline management.
- Coordinated cross-functional teams across all workstreams and successfully launched the platform within the 6-month schedule — on time, within scope, and to full stakeholder satisfaction.

Project Manager / Scheduler – Residential Construction Project

KSD Multicorp | 2023

- Managed end-to-end delivery of a NGN 4.6 billion (~\$3.4M USD) residential construction project — overseeing all phases from foundation to finishing within an 8-month schedule.
- Applied critical path analysis and baseline management to identify and resolve schedule risks early, keeping productivity consistent across contractors and vendors.
- Delivered the project on time and within budget, with high standards of workmanship and full stakeholder satisfaction.

Project Manager – Furniture Production & Installation

Kennyworks Limited | 2022

- Simultaneously managed 3 concurrent residential and commercial furniture projects — overseeing full delivery lifecycle from design approval through fabrication, procurement, logistics, and on-site installation.
- Implemented structured procurement planning and inventory tracking across all 3 projects, reducing material wastage and improving cost efficiency.
- Enhanced client satisfaction through milestone-based reporting and quality control at every stage of each project.

Project Coordinator – Fashion Retail & Product Launch

Bubket Engineering | 2022

- Coordinated seasonal fashion production cycles from concept through manufacturing, quality control, and market launch — aligning supplier timelines to ensure product availability ahead of peak sales periods.
- Implemented inventory tracking processes that reduced stock shortages during high-demand cycles.
- Supported marketing, distribution planning, and release scheduling to align operational execution with business objectives.

KEY PROJECT IMPACT

20% Improvement in on-time milestone delivery — AKK Fibre Optic Project

95% Schedule adherence achieved — A.A. Rano Lubricant Plant E&I; commissioning

15%	Reduction in crew idle time — AKK Fibre Optic deployment
30%	Improvement in operational efficiency — IT systems and process projects
NGN 8B+	Portfolio value managed — BS 2026 Construction & TELCO 2026 projects

Multi-sector Consistent delivery across Oil & Gas, Telecoms, Construction, IT, and Retail

PROFESSIONAL CERTIFICATIONS

- **Project Management Professional (PMP)** — Project Management Institute (PMI)
- **Microsoft Project & Primavera P6 Certification** — Project Scheduling & Controls
- **Project Management Certification** — International Association of Project Managers (IAPM)
- **Cybersecurity Certification** — International Association of Project Managers (IAPM)
- **Agile Scrum Certification** — International Association of Project Managers (IAPM)

EDUCATION

- **Postgraduate Diploma in Engineering – Industrial Automation** (2020)
- **Graduate Diploma – Project Management** (2019)
- **Higher National Diploma (HND) – Mechanical & Fabrication Engineering** (2019)
- **National Youth Service Corps (NYSC)** (2021)
